Subject: Re: Fugitive emissions

Laurance: I think this should be gotten into the public record. Are you forwarding this to the Planning commission?

Subject: Fugitive emissions

Here are additional comments on fugitive emissions.

The Valero operation is 50 crude oil tankers , p66 will have 80.

This will be beyond the comprehension of the planning commission as they seem to buy the idea that the emissions at the SMR will magically be contained within a demarcation line and not cross US 1.

Fugitive emissions presently waft across US1 from the SMR.
